

Groningen Innovation Port.

Harbour of Talent

Are you a startup or scale-up wanting to develop and get in touch with the business community in the Eems Delta region? Or are you already a member of the Eems Delta region business community and want to innovate? Groningen Seaports is pleased to make the connection!

Our aim is to stimulate and develop innovation and utilities. It is our ambition to create new business activity and economic growth and to improve the business climate in the seaports. Innovation plays an important role in this. Innovation takes many forms. A new product or process, or innovations and smart adaptations to existing facilities. With a great deal of flexibility and entrepreneurship, we are accustomed to responding quickly to market developments. That way we create (sometimes literally) new connections.
