

MOI Offshore Entrepreneurs.

Located in Eemshaven | Harbour of Talent

Are you a startup or scale-up wanting to develop and get in touch with the offshore community in Eemshaven? Or are you already a member of the Eemshaven offshore community and want to innovate? Groningen Seaports is pleased to make the connection!

Our aim is to stimulate and develop innovation and utilities. It is our ambition to create new business activity and economic growth and to improve the business climate in the seaports. Innovation plays an important role in this. A new product or process, or innovations and smart adaptations to existing facilities. With a great deal of flexibility and entrepreneurship, we are accustomed to responding quickly to market developments. That way we create (sometimes literally) new connections.

Offshore wind hub Eemshaven

Eemshaven lives and breathes offshore wind. The port has become a base, marshalling and service port for offshore windfarms especially in the German neighbouring part of the North Sea. Eemshaven is geographically well-situated. Moreover, Eemshaven meets all maritime requirements and has the facilities regarding the assembly and shipping of wind turbines.
